K2 Systems Partners With Hivebrite to Create a Customer-Service-Orientated Community

The community is designed to empower K2 System’s customers to help each other, share ideas, and network.

--- Key Facts ---

- Community grew from 0 to more than 2,000 members in one year
- Member activation rate: 71%
- Average month-on-month membership growth: 50%

--- Meet the Customer ---

K2 Systems develops pioneering and highly functional mounting system solutions for photovoltaic installations.

Created in 2004, its mission is to drive worldwide adoption of solar energy for power generation.

--- The Challenge ---

K2 Systems prides itself on its long-standing international experience and expertise and its personal approach to customer relations.

In recent years, interest in renewable energy growth increased faster than ever on a worldwide scale. Consequently, K2 Systems experienced a surge in customers. With customer growth showing no sign of slowing down, the company realized its traditional telephone and email customer support service was not scalable.

The company began to investigate ways to scale its customer service experience to further enhance customer satisfaction.
Within less than one year, the community has grown to more than 2,000 members and achieved a 71% activation rate. The community’s month-on-month growth averages approximately 50%.

The Outcome

Within less than one year, the community has grown to more than 2,000 members and achieved a 71% activation rate. The community’s month-on-month growth averages approximately 50%.

“Our customers deserve the best—an excellent product and outstanding service when they need assistance. With Hivebrite, we have built a vibrant, caring community that advocates for customers and drives customer satisfaction and retention.

The platform is easy to use—for both our team and our members. By empowering our members to ask and answer questions and share their experiences with our products, we have significantly reduced the time our team spends on support tickets.

The authentic feedback and conversations in the community also help us to understand our customers and their needs better.”

Edda Mammen
